EXPERIENCE

Software Development Engineer (SDE-I)

Jul. 2025 – Nov 2025

Lorien Finance

Mumbai, India

- Built RESTful APIs for student lead generation workflows using Node.js and PostgreSQL, handling user authentication, document uploads, and approval status tracking.
- Developed an AI-powered content generation pipeline using LangChain and Gemini API, automating blog creation from title generation to CMS publication in Strapi.
- Automated internal business processes using n8n, eliminating repetitive manual work and improving operational efficiency.

PROJECTS

[GITHUB](#)

ExpenseEase – Smart Personal Finance Assistant | *Node.js, Express, React Native, PostgreSQL, Redis*

- Built a personal finance tracking backend with JWT authentication, implementing access/refresh token rotation and user data isolation.
- Developed a budget suggestion engine that analyzes spending patterns and recommends budgets using EWMA trend analysis, seasonal multipliers, and category-specific volatility thresholds.
- Integrated automated transaction parsing from SMS/email using a custom-trained ONNX model, regex patterns, and Gemini API fallback for unstructured formats.
- Integrated Redis caching with TTL-based invalidation for expensive operations, with graceful degradation when unavailable.
- Built distributed scheduled tasks using BullMQ for budget recalculation, push notification dispatch, and token cleanup.

CloudVault - File Storage API | *TypeScript, Node.js, PostgreSQL, Redis, Cloudflare R2*

- Built a file storage API with pre-signed URL uploads to Cloudflare R2, reducing server bandwidth usage by offloading upload traffic.
- Implemented background job processing with BullMQ for async file validation and metadata extraction.
- Implemented API key authentication with SHA-256 hashing and role-based access control for organization-level file isolation.
- Added comprehensive audit logging and health monitoring endpoints.

ADDITIONAL PROJECTS

Fit Checker (TypeScript, OpenAI Vision API) – AI-powered outfit analyzer using computer vision and LLM reasoning for occasion-based styling recommendations

Hindi Sentiment Analysis (Python, Flask, React, scikit-learn) – NLP model for Hindi movie review sentiment classification with web interface

Viaggio (React, External API) – Travel planning interface with real-time destination data and interactive search

TECHNICAL SKILLS

Languages: JavaScript, Python, Go, SQL

Backend & APIs: Node.js, Express.js, REST APIs, JWT Authentication

Databases: PostgreSQL, MongoDB, Redis, MySQL

Tools & DevOps: Docker, Git, Postman, n8n, AWS

Frontend: React.js, React Native

ML & AI: LangChain, TensorFlow, Scikit-Learn, Pandas

EDUCATION

St. Francis Institute of Technology

Mumbai, India

Bachelor of Engineering in Computer Engineering

Dec. 2021 – May 2025
